## Introduction

---

A splendid consignment for the spring sale of The Western Iowa Shorthorn, and Polled Shorthorn Breeders. The bulls are typically representative of the good herds of the different consignors, and therefore, it will be easy to make pleasing selections.

The Shorthorn bull is a grand animal. He is a cosmopolitan individual, he is known wherever beef cattle are known. The American farmer loves the good Shorthorn, he likes his affiliation with the good Shorthorn. In these days there is great activity in the founding of herds of the several beef breeds. The man who is on the fence as regards the breed he will choose can enter the Shorthorn or Polled Shorthorn camps with all the assurance in the world. Don't ever feel that if you select the Shorthorn either horned or polled that you have made a mistake. The Shorthorn is a historic breed, it is a wonderful breed, it is a breed that will carry any good cowman to the highest flights in beef production, in milk production in the production of the dual-purpose types.

Come to the sale expecting to see good consignments. You won't be disappointed. You will see real beef making bulls, and a very desirable class of females both horned and polled.

Tell your neighbors to attend the sale if they are inclined to buy. It is a good time to buy as prices are within the reach of any man who likes the good Shorthorn.

Sincerely yours,

FRANCIS T. MARTIN.

# Terms and Conditions

---

## **TERMS—Cash.**

Each animal will be sold to the highest bidder. The auctioneer selling will settle all disputes by reselling the animal.

**THE GUARANTEE.** All animals of breeding age are guaranteed breeders. Cows with calves at side are not further guaranteed. All females showing evidence of being in calf waive further breeding guarantee. All bulls are guaranteed breeders. Young bulls, however, should not be allowed to run with herd under 20 months of age. Treat the young bull fairly, squarely, he's deserving of it, give him a break when he is doing his duty in the sirring of good Shorthorn calves. As soon as sold all animals are at purchaser's risk. No animal can be removed for shipment until full settlement is made with the clerk.

The sale manager will not be held responsible for any differences that may arise between the seller and the buyer either legal or otherwise.

The herds contributing to this auction are regularly tested for T. B. and Bangs.

**Nugget's Monogram 2144034**—A real, top-notch young bull by that ace of good sires—Gold Nugget. Here is a whale of a good calf, made to order, patterned to order. This calf is entered in this auction as an attraction for the man wishing to get a capital herd bull prospect. His sire, Gold Nugget, is typical Scotch-bred bull, and he conforms to a character that is typically Scotch. This Victoria pedigree is faultlessly constructed as regards its Scotch foundation, and of the prevalence of the blood of the greatest sires of their time and day.

Gold Nugget was a sensation as a calf, and today he is a sensation as a great young breeding bull. His sire is by Supreme Goldfinder, his dam is by Dreadnaught Sunray 2d a grandson of Cudham Dreadnaught, and his next sire is by the celebrated Collynie Clipper Crest. See this choice prospect.

**Browndale Baron 2149328**—Here is a real promising young bull, a finely colored roan, a good-headed calf, a short-legged calf, a smooth-shouldered calf, and whose pedigree simply can't be bettered. The man casting about for a good bull should make it a point to see this youngster. His sire, Browndale Bud is by Divide Sensation by the celebrated Browndale Archer conceded by many to be the greatest breeding son of the International champion, Browndale Count. His second sire, Kilblean Count, has a deep sprinkling of Browndale blood, and his next sire is Villager's Regalia by Villager's Wanderer one of the very best sons of the champion, Villager's Coronet by Imp. Villager. The writer knows this blood, and its workings. See this calf if you want the good sort.

**Browndale Baronet 2054736**—Geo. Cuckie & Sons are listing their herd bull, Browndale Baronet, and doubtless a better red bull will not be sold in Iowa during the Spring sale season. This bull is a good bull. His line of sires is impressive. His sire, Browndale Masterstroke is by Balcain Brownale by Balcain Regal Star whose dam is by Browndale Hero by Browndale Count, and his second dam is a grandson of Gainford Champion. There is top blood in the pedigree of this good bull. It is enriching blood all down the line, and the buyer of this bull can figure that he has a bull whose pedigree can't be discounted. See this good red bull. It will pay you to do so.

**Master Browndale 2140001**—A bull with a lot of substance and quality, and certainly with plenty of good breeding. This sale will afford a fine opportunity to buy good bulls that are right in every way. The farmer is awake these days to the advantages of buying good bulls. The livestock farmers day by day are going in for a program which aims at the raising of his own feeding cattle. Good bulls used on a set of good cows will turn the trick. See the good bulls in this sale. They will suit the good breeder, and the good farmer.

**Milloray Jasmine 1894500**—No better pedigree than this can be found. Here's a wonderful pedigree and representing the greatest efforts of the Owens family in constructive breed building. The writer has witnessed for many years the constructive tendencies of this Owens family in the making of their herd one of the best in the entire country. The Owens used great bulls, their herd bull selections were of a high order, and they developed their cattle by a liberal feeding program. This good matron is the kind that will add fame to any good herd. She is well worth considering by the prospective buyer.

**Nonpareil's Maid 2024485**—A wonderful pedigree, and featuring the work of George Struve in the many years that he has bred Shorthorns on his Carroll County farm. George Struve during all the years he has been in the business has striven with all his might to make the breed a better breed. He has used one good sire after another, he has been a great developer of this young stock, and the public long since has accorded his productions at a high rating. The Nonpareil is a great tribe, and ever since their introduction to America's herds they have been highly esteemed.

**Lady Nonpareil 2097905**—Another one of those grand Nonpareils. What breeder of the noble red, white and roan fails to get a thrill by the scanning of the blood that is found in this pedigree. Sylvester Campbell laid the foundation in the distant past, and America's breeders carried on the good work when the tribe found its way through frequent importations to America's shores. Breeders of the good Shorthorn on the fertile cornbelt farm should do everything possible to perpetuate seed like this. It is seed of the strictest desirability.

It is an oldtime sort, it's a great tribe, it is a most respected family from the Aberdeenshire shrine. No breeder turns away from the Secrets, he prizes them too highly to overlook their excellence in his breed building activities. Here is a choice heifer, one that will make a good breeding unit. She is worth taking home, she will multiply her kind.

**Goldspur Sunlight**—Is a promising calf, he's sappy, he's thick, he's got a good head, he's got short legs, and he has a fine coat of hair. The man who gets this calf if he is a good cowman ought to have a real bull in a year or so. Usually the good bull calf develops as he promises. Good blood can't be ignored. The top sires in this pedigree are virtually in a class by themselves. His dam's sire, Gainford Browndale is by Edellyn Premier the first, and the highest priced son of Browndale Count, and who was the first son of Browndale Count to come west of the Mississippi river. And Mina's Victor 2d is by Jilt Victor who was used with great success in a noted Iowa herd, and the next sire, Rookwood Kingston is a grandson of Imp. Edgcote Toft. It's a great pedigree to say the least and this calf is as good as his pedigree.

Lord Browndale—A good rugged type, and who will sire a class of calves that will solve the beefmaking problem of the good farmer. Beef-making from the baby beef standpoint is a great business. It won't ever lose the favor of the good farmer, it will be a good business as long as men eat beef. Look over this vigorous type on sale day.

Secret Nonpareil—Carroll County where Clarence Stammer resides has had a lot to do with the half a dozen top crosses in this pedigree. George Struve resides in Carroll county also, and Shorthorn breeders know the good work George Struve has done for the breed for the past thirty years or more. During those years George Struve has been in the very forefront in the making of the breed a better breed. The blood in the top crosses of this pedigree, therefore, is known, and recognized for its constructive characteristics. There is no better sort than the Nonpareil. The Campbell Nonpareil is a tribe that one can tie to knowing there is nothing better.

Nonpareil Baron—Here is another pedigree the Struves have had a lot to do with. There is no way to belittle the construction of this pedigree. It can't be done. The buyer if he is founding a herd could pick this sort blindfolded, and make a capital selection. Good blood is the secret in the business of improving a breed of livestock. Have good blood as the base of one's operations and then add to it good care, and the problem is solved. But don't attempt to build without the saving grace of good blood—the right kind of blood.

Lady Browndale 11th—A better pedigree than this couldn't be written. It isn't in the picture to find blood better than this. Her sire is Secret Goldspur by Goldspur Monarch, and he by Divide Star Goldspur by Browndale Goldspur. His dam is by Village Eclipse by the great Village Beau one of the very first sons of Imp. Villager to achieve a great name as a sire. His third sire is Kilblean Type by The Royal Type by the many times champion, Cumberland's Type. Who's going to fix this pedigree? Who's going to add blood here to give this pedigree greater embellishment? It's out of the question to improve this pedigree. See the nice things Clarence Stammer is putting in this auction. You'll say they're nice things when you see 'em.

Dale's Glory 2069872—Here is a nice, smooth, well finished bull, a good doer, and one that has a surplus of good blood. The Princess Royal is one of our best respected sorts, a tribe that has come down through the years with colors flying. There isn't a better tribe, and the blood represented through the sires can't be bettered. Good bulls of this age aren't numerous, they're scarce, awfully scarce, and they are being rapidly picked up. This writer is glad to have the opportunity to say something nice about the Soren Jensen herd. The time is close to hand when such herds will have their hands full in supplying the trade with good seedstock.

Stroke's Blackwatch 2092770—Soren Jensen is a good cattleman. His herd is well cared for, he never pinches at the feed bucket to get the growth necessary in his growing stock. The writer can recommend his two bulls selling in this auction. In this young bull is a great heritage of good blood. His sire, Helfred Blackwatch is a son of the great Sni-A-Bar Golden Ring by Prentice, and his dam is by Ballylin Rodney by Imp. Rodney. And Prentice is regarded as one of the best sires ever in service at Sni-A-Bar farm. This bull is the thick, soggy type, he is close to the ground, and he ought to prove himself a good sire. Certainly there is no better tribe than the Princess Royal. It is a tribe that is held in the highest esteem. Look over this good bull.

**RED MAMIE x**

One of the foundation stones in the founding of the Polled Shorthorn herd of Z. T. Dunham. She, and her descendants were the means of scattering seed stock to practically every section of the country. Z. T. Dunham is the grand, old man of the present day Polled Shorthorn breeders. In this field he is the pioneer of pioneers. It was he who first conceived the idea that the Shorthorn without the horns would be a most desirable animal for the average cornbelt farmer.

Z. T. Dunham, therefore, was a trail blazer. In Polled Shorthorn production he is the Daniel Boone of his day, he led, and others followed. It's a great thing to have in our midst at this time a man who has spent close to seventy-five years of working in the interests of his chosen breed. He first started with the Shorthorn in 1868, and a few years later he took up the breeding of the hornless Shorthorn.

**Sir Perfection 5th x2121231**—A grand pedigree, a pedigree that makes one's mouth water. Note the great sires, note the great Duchess of Gloster tribe, a tribe that was one of Amos Cruickshank's greatest creations. The veteran Z. T. Dunham has spent many years with the Shorthorn even before he took up the cause of the Polled Shorthorn. In the sixties, this grand old man started breeding Shorthorns, and in the very early eighties he decided to produce the hornless Shorthorn, and the country knows with what results.

It's a great thing to build for permanence in the improvement of a breed of livestock. The man who loves an improved breed of livestock likes to build for permanence, to erect a structure that time will not crumble. Z. T. Dunham is such a man. The country can boast of a man in the person of Z. T. Dunham that he stuck to his last in cattle breeding, that his aim always was to build for permanence.

T. Dunham. The Dunham herd is one of the very early established herds of America, one has got to dig up ancient history so to speak in dealing with its early activities. The grand old man, Z. T. Dunham has left a lasting name in America's improved cattle stocks. His name will remain with the years because of his consistency of purpose in sticking to his ideals—in not swerving from his ideals.

It was one of the earliest tribes with which he became identified, and he scattered this good seed to the four corners. Years and years ago one would hear of the excellence of the Dunham Lady Perfects. Here is polled blood at its best, here is blood that has withstood the ravages of time, a tribe that has not been shoved aside for something which was thought better. This young bull ought to do his work well. He ought to give satisfaction in the hands of a good cowman.

But look at the polled crosses in the pedigree, and you'll say that it is a good pedigree, and which combines the best blood in the dual-purpose Shorthorn. That is the great thing in the Shorthorn as is represented by this line of breeding you have the dual qualities of beef and milk. Beef and milk are great qualities and should be guarded with jealousy by the breed's adherents.

In other words, it's a pedigree that has its share of polled blood, and upon a strictly Cruickshank foundation. One can't go wrong in taking up with such blood. It's proved blood from top to bottom. A bull with such good blood has a lot to recommend his use to his buyer. Look him over and if you take him home with you, you ought to feel assured of having one that will withstand the test.

The fifteen top sires are polled, and what a fine pedigree it is. There are no better polled Shorthorns than the Lady Perfects. Z. T. Dunham knew what they were years ago, and that's why he stuck to them for more than three-score years. Consistency was the compelling element in his building of the breed. He didn't shilly shally—he went straight ahead to his goal.

The Ruppert herd at Mallard turned out its share of good ones, and the Hugh Ryon herd was one of the very earliest of polled herds. The Claus Johnson herd was a noted collection, and last but not least was the Brodsky herd at Rolfe which in its day was one of the very outstanding herds of Iowa. This is mentioned to show that this pedigree is backed by the blood of known worth. The sires represented, too, are prominent, and the writer knew many of them. Victoria's Model—Dwight Wilson started right when he founded his herd. He got the best blood of the breed when he founded his herd with the Victorias—the Cruickshank Victorias. This pedigree has a wonderful list of sires in the Lind, Cookson, Bruce, Prather Duthie, and Cruickshank bulls.

There isn't a flaw in such a pedigree. He who buys this bull can say he has one of the best bred bulls of the breed.

Victoria 53d.....			Viscount 18507.....

Victoria's Victory—Here is a rugged youngster, and is ready for service any time now if he is handled carefully. Certainly his pedigree can't be improved upon. Those sires in this pedigree smacks of the days of the Linds, the Cooksons, the Prathers, the Harrises. The writer had an intimate acquaintance with these herds. He saw them in all their glory, and he has witnessed the great success they had attained. This is mentioned here because this blood is dominant in the Wilson consignment.

**Sultana 5th x2011556**—Otto Johnson is a Polled Shorthorn improver. He works improvement in his cattle by using good bulls, and giving the herd the proper care. Otto Johnson likes good cattle, he likes the company of good cattle, he glories in the sight of good cattle. Such a man will make a success of the business of improving a breed of cattle. In this good matron he is submitting one of the tops of his herd. And his herd is pretty well made up of top specimens. This good matron is typey, she is a natural flesh carrier, she is the good doing kind. She will calve to the service of Chancellor's Memory.

**Sunnyblink Fairy x2112483**—Otto Johnson sells a real heifer in Sunnyblink Fairy. She will make a grand matron when fully developed. She will be a real buy for the man who wants that combination of individual merit by inheritance. One can't turn one's back on the theory that good blood doesn't breed on. It does breed on, perhaps there will be an occasional miss, but it is a hard and fast rule that good blood will in most cases make its influence felt. Otto Johnson as is mentioned parts with a good heifer here, but he is willing to share his good ones, to pass them along to other cattlemen who want the good kind.

**Brawith Dale x2137663**—Here is a young bull that is described as a real prospect, and why shouldn't he be? Here is a pedigree made to order. It's a pedigree that has plenty of polled blood in the top crosses, and below that are a fine array of American bred sires, and at the bottom is the name of Amos Cruickshank.

The Brawith Bud is a great family, it is a family that has been in careful hands for many generations. The man looking for a top herd bull prospect is asked to see this bull.

**Impression's Count x2114461**—Here is a wonderful pedigree with the three top dams bred by Laughlin, and by sires bred by Teegardin, Thieman, and again Teegardin, and then comes Edgcote Dale by Imp. Edgcote Toft the bull that succeeded Double Dale in the herd of Owen Kane. Succeeding in the list of sires is Golden Plate bred by James Durno, and down the line are Peterkin, Reid, Durno, Duthie, Gordon, and again Duthie. Here is the finest quality of polled blood resting on a foundation that is imbedded deeply in the finest ancestry of Scotland's greatest herds. The writer knows the Laughlin herd, and the Laughlin herd is known by the country's Polled Shorthorn adherents. See this bull, he's of good age, he is a red roan, and certainly his pedigree baffles criticism.

**Roan General x2149506**—This is a grand good pedigree, from top to bottom there is history making blood, at the top are bulls whose sires are known the country over for the quality of their work. In the top brackets are bulls that came from the Owen Kane, and Howell Rees & Sons' herds, two great Nebraska herds that produced seedstock of the highest quality for many years. At the bottom are Bates bred bulls of the Kirklevington tribe, and in their day they were great cattle. This calf's breeding ought to be a guarantee that he will perform according to schedule, that good blood will assert its supremacy.

Victory Crown x2130472—The Gabriel herd is one of the old herds of the state. C. A. Gabriel founded it, and since his retirement his son, S. Keith Gabriel, has succeeded him in its ownership. These three bulls are reds that are listed for this auction, and Keith Gabriel has them in splendid fix. The Gabriel herd is full to the brim with polled blood. The Shorthorn bull without the horns has a firm hold on the affections of a great mass of America's farmers and cattlemen.

Perfect Model x2130471—These bulls of Keith Gabriel's are young but they are thrifty, and the good doing kind. They will make good bulls at maturity, and their intensified polled blood should knock the horns on their get. It's a great thing to speak of the Shorthorn as the great cosmopolitan breed. It's that, all right. The Shorthorn's friends are legion. His friends are everywhere and all are enthusiastic boosters for the breed's fine qualities.

Colonel Rex x2130469—These short-form pedigrees don't show the intensity of the polled blood in the pedigrees of Keith Gabriel's bulls. But it's there, and it will assert itself in their work as sires. Good polled bulls are plenty scarce. They are not to be picked off the bushes. There is a great demand for the hornless Shorthorn bull. There are cattlemen without number in this country that would like to have his Shorthorns without the horns hence the popularity of the Polled Shorthorn.
